

# SAW CRYPTO GAME

THE GAME FOR DEGENERATES SEEKING THE HIGHEST GAINS

HOW YOU PLAY THE CARDS YOU'RE DEALT, THAT'S ALL THAT MATTERS.

---

# ABOUT

## WELCOME TO THE CRYPTO GAME FOR DEGENERATES

SAW is a unique, special & uncommon deflationary, self-regenerating automatic liquidity providing protocol.

Every 48 hours, the \$AW Protocol adjusts the tax rate of the transactions to target paper hands and reward true hodlers.

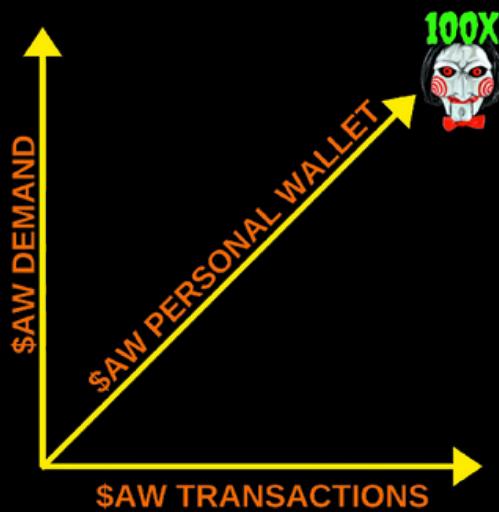

The Tax is divided in 2, reward distribution and auto-locking liquidity to increase price floor.

# THE SCIENCE OF NUMBER GO UP

As the demand for \$SAW tokens increases and more transactions happens, the number of \$SAW tokens you own increases.

This tied with the manual burns we will be executing will create an infinite positive loop, pumping the token to new highs and rewarding diamond hands.

WallStreetBets won the fight against hedge funds. Just by buying and holding, as the key to success.

## MANUAL BURNS AND CLUES

Every 2 days we will execute manual burns to drive the value of the token up and incentives the community to hold. This tokens will be locked to avoid any type of FUD.

We will give clues of when we will be opening a trading window Tax-Free. This allows you to take advantage of price movements, also, presents the best opportunity to get back into the game or build up your stack.

It also changes the entire dynamic behind DeFi by presenting new trading strategies. The savviest of traders won't make decisions by referencing price alone, but also consider tax fee, which could result in massive gains. As always, do your own research.

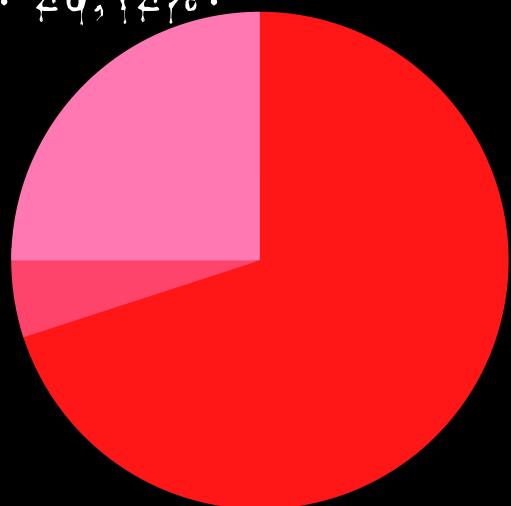

# TOKENOMICS

THIS SECTION INCLUDES THE PROJECT PROCESSES, IMPLEMENTATION, AND EXECUTION.

Manual Burns: 20,12%

Marketing Fund:

5%

PreSale:  
74,88%

71.22% of the tokens will be distributed via Presale.

23.78% will be used for manual burns and they will be strategically locked to avoid FUD.

The marketing fund as well will be locked to avoid any type of FUD and enhance confidence.

## \$AW MACROECONOMICS

The price movements of traditional cryptocurrencies are tightly coupled.

When Bitcoin goes down, so does the rest of the market, and vice-versa.

\$AW is not subject to this same behavior because the protocol enforces its own independent set of rules. As a result, it presents a unique value and opportunity for the DeFi space to play a new economic game.

---

# RULES

- \* Sell within 2 days: 48% TAX (36% Back to the Liquidity Pool, 12% Redistributed to Holders)
- \* Sell within 4 days: 32% TAX (24% Back to the Liquidity Pool, 8% Redistributed to Holders)
- \* Sell within 6 days: 40% TAX (30% Back to the Liquidity Pool, 10% Redistributed to Holders)
- \* Sell within 8 days: 24% TAX (18% Back to the Liquidity Pool, 6% Redistributed to Holders)
- \* Standard burn: 16% TAX (12% Back to the Liquidity Pool, 4% Redistributed to Holders)

Every 3 days we will give a hint about what time we will be opening a trading window TAX-FREE!

## PRESALE LAUNCH & TOKEN DISTRIBUTION

The \$SAW token will be distributed via PreSale.

A total of 6billion \$SAW tokens will be distributed among those who participate in the presale.

Immediately after the Hard Cap is reached anyone will be able to call finalize and list the token in pancakeswap

## ANTI-WHALE SYSTEM

The SAW protocol's Anti-Whale function doesn't allow any wallet to have more than 1.5% of total supply, eliminating the possibilities of a big dump from one of the holders and giving a fair opportunity to everybody. The Max amount permitted per wallet is 1000.000.000 (1000 Million) (1.5%)

For the Presale and after launch our contract will have a function that won't allow to have more than 1.5% of the total supply in a wallet

This is meant to limit the flow of initial capital into the presale, providing a more fair and distributed opportunity between participants.

# PROJECT ROADMAP

**THIS SECTION INCLUDES THE PROJECT PROCESSES, IMPLEMENTATION, AND EXECUTION.**

TASK	DATE
<b>LAUNCH PRESALE</b> VIA UNICRYPT	Q2
<b>BUILD STRONG COMMUNITY</b> ENFORCE TELEGRAM AND SOCIAL MEDIAS	Q2
<b>LOCK LIQUIDITY</b> MAKING IMPOSSIBLE TO RUG PULL	Q2
<b>MARKETING BOOST</b> REDDIT, TIKTOK, TWITTER.	Q2
<b>COIN TRACKERS LISTINGS</b> COINMARKETCAP, COINGECKO, BLOCKFOLIO	Q2
<b>LISTINGS ON CEX'S</b> TO BOOST AWARENESS AND EASY ACCESS TO THE TOKEN	Q3
<b>MORE MILESTONES TO COME!</b>	05
